

Christian Lacroix

SUN20 EYEWEAR COLLECTION

Unashamedly avant-garde, the latest sunglass collection by Christian Lacroix is a spontaneous combination of colours and patterns exploding in a unique way.

Slightly oversized, CL5083 is made of premium Italian acetate and features the natural eccentricity of two of the boldest creatures in nature, the leopard and the peacock. Gorgeous laminated prints accent the model in an elegant way to the bottom and continue in a swoosh upon the temple— signed off with a sleek gold metal logo in typical Lacroix style.

The frame also comes in a chic, zebra-like pattern combined with flattering shiny black temples.

CL5084 is a petite cat-eye frame with stunning patterns built on a clear acetate base, exuding Parisian decor. Taking iconic prints found across Lacroix's ready-to-wear and interiors offering, this stylish frame comes in several options which all have a bespoke feel. From the colourful opulence of gemstones of *Pietra Dura*, to the new Vichy check pattern in hot pink and white of *L'aveu*, this style is an exuberant combination of quirkiness and extravagance. The metal temples have a vintage feel and feature a cut-out detail in the end tips resembling a needle used by designers in Fashion Houses.

The styles are signed off with a new brand signature, a gold butterfly emblem on the inside of the end tips. Fitting for the woman with natural joie de vivre, the Christian Lacroix woman.
